A Therapy Beyond Words

Family Constellations originally developed by **Bert Hellinger**, over 30 years ago in Germany, evolved from psychodynamic, family systemic and existential approaches. The method reveals deeper, subconscious patterns that can have a limiting or even destructive impact. Constellation work is able to address these patterns even when their roots go back several generations. The approach aims to help participants understand the hidden systemic orders of love operating in relationship systems, and the powerful resolutions to conflict that this understanding can make possible.

The training is a combination of lectures, workshops and experiential groups, organized to meet the needs of persons with various levels of experience ensuring you receive the most suitable professional development. As the Intensive is a residential program it allows participants the best environment for learning, connecting and sharing with peers from a wide variety of professional backgrounds.

Professional Development points are available for all PACFA, CAPA and GANZ members. Registered Psychologists can claim CPD hours to meet PBA requirements.
