

Nature Care College

Accessing Database Resources

1. Once you have downloaded the Database Password sheet from the Moodle 'Useful Student Resources' section, go to the Nature College website, choose 'Enrolment' and then the 'Student Resources & Textbook' section.

Scroll down to 'College Databases' and check the 'Important' section, for any updates in regards to the databases/passwords.

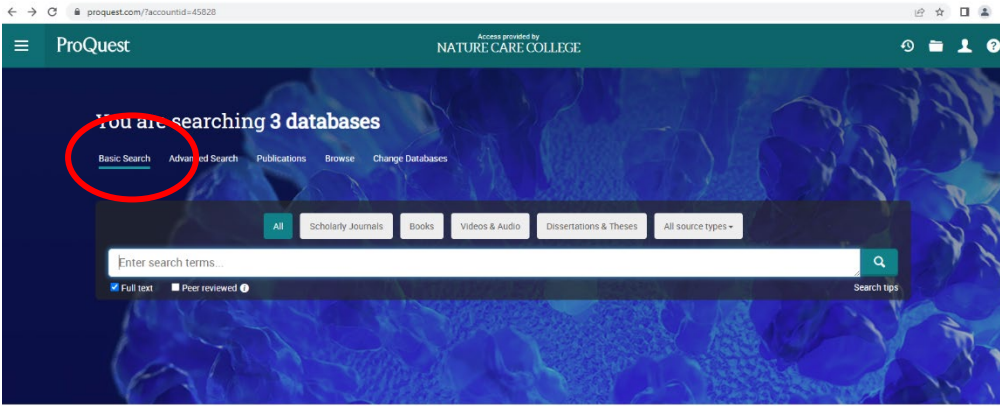

ProQuest - Health Research Premium Collection

Available from Term 1, 2018

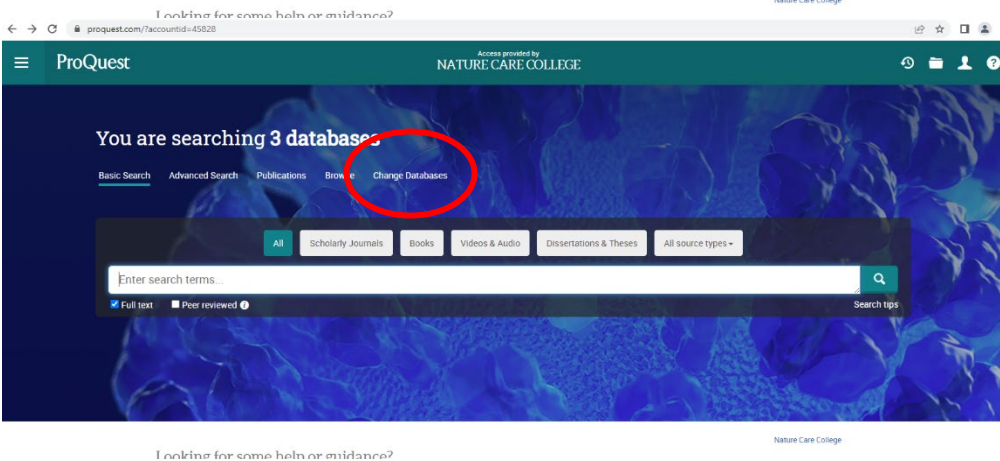

Includes the following databases:

- 1. Health & Medical Collection**
In-depth coverage from leading biomedical publications.
- 2. Nursing & Allied Health Database**
Reliable healthcare information covering nursing, allied health, alternative and complementary medicine, and much more.
- 3. Health Management Database**
Relevant resources for anyone interested in the business of running a health organization.
- 4. Psychology Database**
Key information from leading psychology and psychosomatic publications.
- 5. Public Health Database**
A global resource for students, faculty, researchers, clinicians, policy makers, and all others involved in the study of population and public health.
- 6. Family Health Database**
Journals and magazines covering an enormous range of health subjects, from sports injuries to women's health, from food and nutrition to midwifery, from eye care to dentistry.
- 7. MEDLINE® (Citations only)**
A bibliographic database produced by the U.S. National Library of Medicine (NLM).

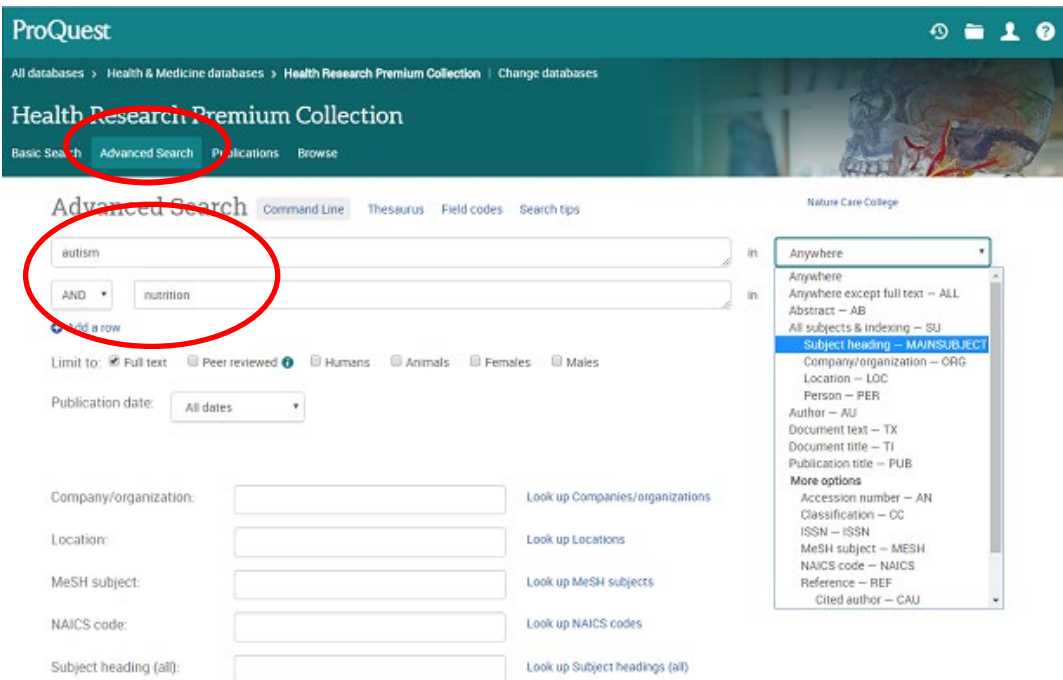

2. Click on the ProQuest link and fill in active login details when prompted.

3. Start a 'Basic Search' through all databases by adding a keyword to the search box. Make sure 'Full Text' is ticked, as well as 'peer reviewed' if required.

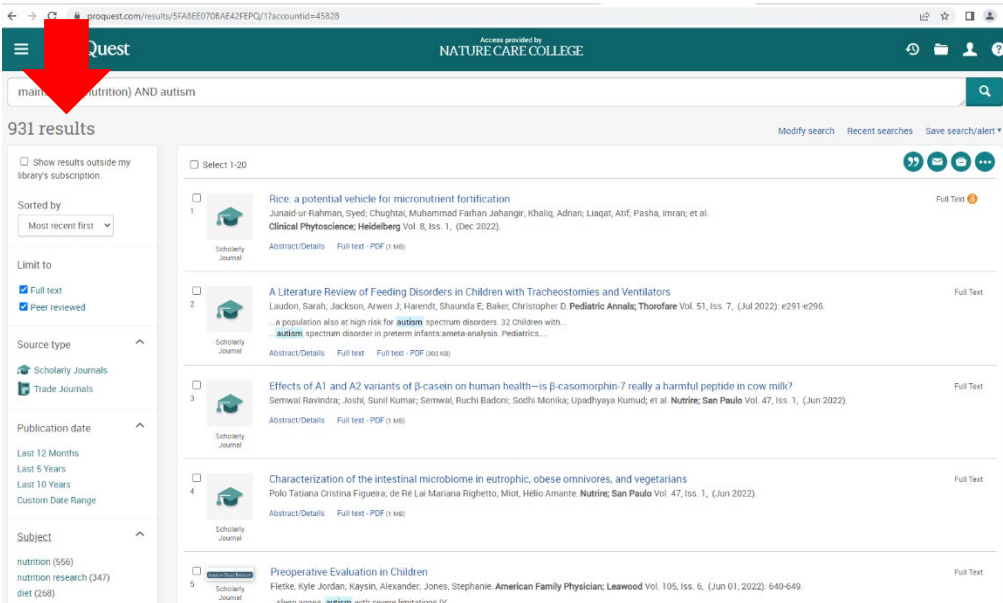

3.1. Optional: You can search a specific database by clicking on 'Change Databases' and only ticking the desired database.

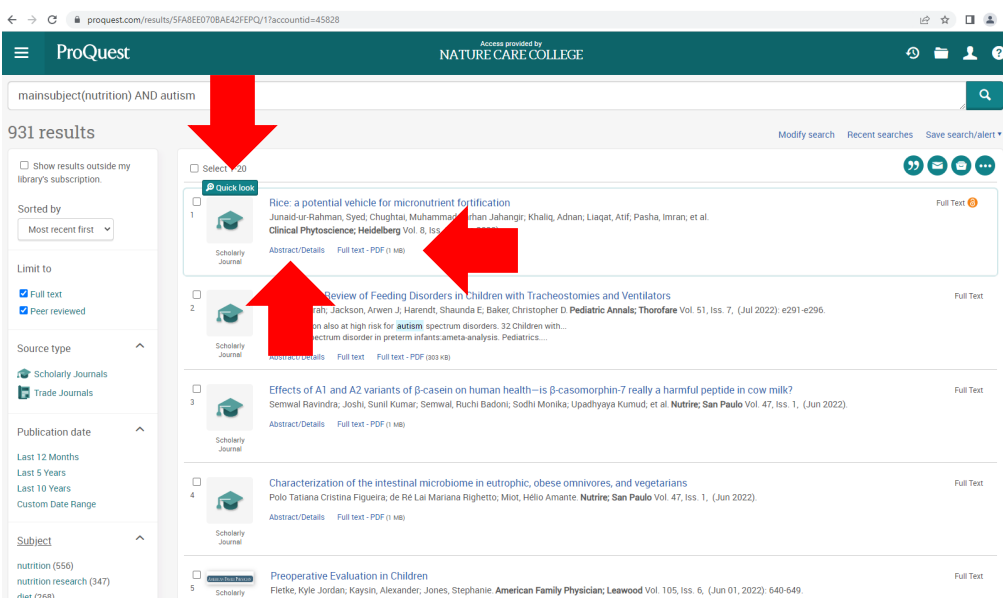

5. You can also start an 'Advanced Search', which will give you the option to add more than one keyword, as well as a number of additional search limiters. Please note, that each keyword will need to be in a separate field. Don't forget to make sure 'Full Text' is ticked.

Searching 'Anywhere' in the drop-down menu on the right side, will make the search as wide as possible. A more specific search can be done by selecting a category – mostly you would be interested in a 'Subject Heading'.

6. The number of results is listed on the left side, along with choices to narrow down your search results. Your main concern would be narrowing down the 'Publication date', 'Document type' and 'Subject' section.

7. In order to see an abstract (summary) of the article, click on the 'Quick look' button that will pop up if you hover over the title you are interested in or click on 'Abstract/Details'.

If you think, the article is the right choice for you, click on 'Full text' to open it. You will then be able to read, save or print the article.
